

COMPATABILITY

June 2, 2020

Aqueous Technologies has released our latest version of Zero Ion software. This version includes Windows 10 compatibility and a complete update to the operator interface while maintaining the integrity of the original zero ion g3 cleanliness algorithm.

Changes include: updated screen layouts, reporting features, database look ups, rolling graphs, improved calibration accuracy, an integrated test results graph, board area - pass/fail - timeout slider bars, enhanced screen continuity, current status box updates and other features and bug fixes to enhance the user experience and maintain compatibility with modern Microsoft requirements.

Upgrades are now available for order. Please reach out to an Aqueous Technologies team member for more information.
